CDPHE Spills Tracking System Data Entry Form 2015-0592.pdf

Heads up—CO has reported another possible mine spill. This is in whole other part of the State (nowhere near GKM).

State has executed call-down and is responding.

R8 is also working on understanding what the situation is, and will report out more soon.

In an abundance of caution, I wanted you all to be aware. (I will forward a second email that has additional information.)

No report to the NRC yet. Joyel is on phones and will follow up with CDPHE and Larimer county for more information. If needed Kerry Guy on response will go to check it out.

Good afternoon: In case you hadn't heard about this. We don't have a lot of information about it, but I thought you'd want a heads up.

Warren

Hey folks: Forwarding this along. I have no idea whether this is minor or major, but wanted to pass it along to some of you who might know.

I have had no calls...but since it contains the words "mines" and "orange water," I may get calls.

Mark

Attached is a report for Larimer County of a release of orange/red water from the ground right in front of entrance to an abandoned mine. Caller estimated the release at 20-40 gallons/min, which flowed downhill to Seven Mile Creek, which eventually reaches the Cache La Poudre River.

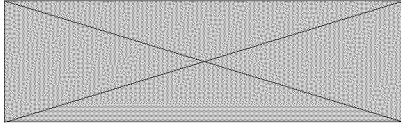

Thank you,

Ann
